Projects

Fitness Exercise Website (MERN Stack)

API Integration, Authentication

Developed a comprehensive fitness exercise website using the MERN stack. Implemented API integration for dynamic content and user authentication.

Calories Prediction Website (RFR Model)

Web Development, Machine Learning

Built a website for predicting calories burnt using a Random Forest Regression (RFR) model. The platform utilizes machine learning to provide accurate predictions.

Dog Toy Shop App (Flutter)

Mobile App Development

Created a Flutter-based mobile app for purchasing dog toys. The app provides a seamless shopping experience for dog enthusiasts, offering a wide range of products.

Hobbies and Extracurricular Activities

Hostel Discipline Head (First Year)

Leadership, Organizational Skills

Served as the Hostel Discipline Head during the first year, ensuring a conducive living environment for fellow students.

Event Organization

Sports Events, Cultural Nights

Organized a four-day long sports event and coordinated the annual hostel night "Raabata." Successfully managed logistics and ensured a memorable experience
